Mini-Defence Cloud Solution
Smart Grid Hybrid Energy Supply System
UAV
SUPCEN
ASC/INTEL
Data Center and SIGCEN
Portable Low Footprint C2 Device
Collaborative Multi-Agent System for Unmanned Platforms
OPCEN/JOC (Multidomain C2, KOSMOS, Intelligence Platform, Cyber Security Framework)
Fixed Acoustic Sensor
Perimeter Security System C2
Soldiers with ISR Sensors
Robotic Patrol Dog
Waste and Water Management System
Digitally-Aided Close Air Support
Satellite Communications and Tactical Mission Node
Accommodation and Life Base Support Facilities
Unattended Ground Sensor
Medical Centre
5G Station
Holistic Situational Awareness
Advanced Access Control Identification Solution
Mobile Ad-hoc NETwork handheld radios
Manned Surface Vehicle
Maritime Gimbal Thermal Camera
Unmanned Surface Vehicle
PROTEAS
DePloyable Special OpeRations FOrces MulTi Environment CommAnd Post and C2 System (SOFCPC2)
Co-funded by the European Union
PROTEAS Project has received funding from the European Defence Fund 2022 Programme (EDF-2022-DA) under Grant Agreement No. 101121371-PROTEAS-EDF-2022-DA, and the Ministries of Defence of Greece, France, Norway, Italy and Belgium.
